

Assignment Details

The goal of this assignment is to assess your mobile application development knowledge and general programming style.

Build a simple application that displays the list of products and detail page of selected product. Things you have to take into consideration:

- Application structure;
- Performance;
- Image cache;
- Exception handling.
- Offline/caching strategies;
- Landscape mode support
- Unit tests

You can obtain the list of products from the following REST endpoint with HTTP GET method:

- <https://s3-eu-west-1.amazonaws.com/developer-application-test/cart/list>

A product can be obtained from the following endpoint with HTTP GET method:

- https://s3-eu-west-1.amazonaws.com/developer-application-test/cart/{product_id}/detail
